Skillset

Client Side

React | JavaScript (ES Next)

Redux | React Context

styled-components

Sass | CSS Grid

Electron

Swift 5

Server Side

Node.js

Express

AWS API Gateway

Socket.io

SAML (Okta) | Passport

OAuth2 API Authorization

Databases

MongoDB & Mongoose.js

MySQL & Sequelize

Firebase Real-time DB

AWS Dynamo DB

Tooling & Deployment

Webpack | NGINX | Heroku

Git | GitHub | Gitlab

Experience

deepwatch

Front End Development Intern → **vSOC Developer** → **Integration Developer I** → **Developer II** (*November 2017 - Present*)

Grew from an internship to a mid-level development position under the vSOC Research & Development team; stood up and integrated two large MERN stack applications, and a build tool for hosting custom-branded dashboards in Splunk; headed the integration of our custom applications with the Okta IDP and NetSuite CRM; received a company-wide 2019 Excellence Award for attention to detail and user experience; managed and conducted code review for our internship program

Technologies: React | Redux | React Context | styled-components | Node.js | MongoDB | Mongoose | Splunk SDK | SAML | Express | OAuth | GitLab | Webpack | NGINX | EC2 | Bash

Trilogy Education Services

Teaching Assistant (*January 2018 - Present*)

I troubleshoot students' environment- and code-related issues on the fly, by walking students through the problem-solving process, and recapitulating the concepts learned to diagnose and solve those problems. Grading coursework is an opportunity to evaluate students' code and mentor their growth by suggesting refactoring opportunities and ways to avoid pitfalls. Working for the program provides a means to stay fresh with current tools in web development, and a means to share my enthusiasm for the topics we cover with new members in the community.

Technologies: MySQL | Sequelize | MongoDB | Mongoose | Firebase | MVC & Templating | Node.js | React | jQuery | CSS | JavaScript | Bash
